Summary

Data-driven Business and Product Analyst with 2.5 years of experience in fintech and lending analytics. Strong expertise in SQL-driven analysis, funnel optimization, experimentation insights, and dashboarding to support product and strategic decisions. Experienced in translating complex data into actionable recommendations while collaborating cross-functionally with product, marketing, and engineering teams.

Experience

EXL Service

Jan 2024 – Present

Consultant II

Gurugram, Haryana

Operations Analytics — US Sub-prime Lender

- * Led analytics for 3-phase strategic initiative covering 1500 branches: consolidation impact, future consolidation planning, and new branch expansion opportunity analysis.
- * Analyzed impact of 50 consolidated branches on nearby locations, evaluating customer redistribution and operational load changes.
- * Migrated two critical legacy SAS codes to Databricks (application routing logic and ZIP-to-branch mapping for marketing).
- * Managed and enhanced multiple high-impact Power BI dashboards supporting operations and marketing teams.

Business Analyst — Leading Global Credit Card Company

- * Conducted end-to-end customer card application funnel analysis (Landing → Apply → Approval → Completion) to identify friction points impacting completion rate.
- * Proposed experimentation strategies and performed post A/B test analysis to measure impact on completion KPIs.
- * Collaborated with product and tech teams to translate insights into website and journey improvements.

Internal Project — Predictive Modeling

- * Built KNN and Linear Regression models to predict IPL auction prices using historical performance data.
- * Performed feature engineering, model evaluation, and optimization to improve prediction accuracy.

Cogoport

Aug 2023 – Oct 2023

Software Development Engineer

Gurugram, Haryana

- Enhanced UI for core logistics workflows using React.
- Integrated frontend with backend APIs using Node.js.

Tailwnd

Sep 2022 – Aug 2023

Founding Engineer

Remote

- Led full-stack development delivering **5+ production features**.
- Integrated spaced repetition algorithms improving learning speed by **30%**.
- Built scheduling systems reducing workflow time by **90%**.

MeraPashu360

May 2022 – Jul 2022

Software Engineer Intern

Gurugram, Haryana

- Built a chatbot automating **80%** of customer queries.
